Gram Sabha Consent and Forest Clearance

Source: TH

Why in News?

The **Union Ministry of Tribal Affairs (MoTA)** stated in an official communication to the Ministry of Power that the **Forest Rights Act (FRA), 2006** has "*no provision for obtaining consent of the Gram Sabha for Stage-II forest clearance.*"

- The MoTA further asserted that such matters do not fall under its purview, sparking a debate on the dilution of tribal rights and the mandatory requirement of **Gram Sabha consent for infrastructure projects**.

What is the Issue Regarding Gram Sabha Consent?

- **Project Delays:** The requirement for **Gram Sabha consent for forest land diversion** has emerged as a major hurdle for large infrastructure projects, particularly hydropower projects of the **National Hydroelectric Power Corporation (NHPC)**.
- **Clearance Bottleneck:** A Parliamentary Standing Committee on Public Undertakings identified the requirement of **100% consent from affected Gram Sabhas** as a major bottleneck.
 - Under-construction NHPC projects reportedly face an average **106-month delay in forest clearance**, compared with 7.2 months for environmental clearance.
 - A prime example is the **Teesta-IV Hydroelectric Project (HEP)**, which remains indefinitely stalled because consent is pending from three Gram Panchayats, despite consent having been obtained from seven others.
- **Proposal for Qualified Super-Majority:** To balance community participation with infrastructure needs, the Parliamentary Committee, drawing on practices in Brazil, Australia and New Zealand, recommended exploring a **70-75% consent threshold among affected Gram Sabhas for large hydropower projects of national importance**. The proposal has prompted consultations between the Ministry of Power and MoTA.

What is the Legal Origin of Gram Sabha Consent for Forest Diversion?

- **Statutory Text of the FRA, 2006:** The primary text of the FRA does not explicitly use the phrase "

Gram Sabha consent for forest clearance " regarding the diversion of forest land for non-forestry purposes.

- However, **Section 5 of the FRA, 2006** explicitly empowers the Gram Sabha to protect **wildlife, forest, biodiversity, and community forest resources**. This section forms the substantive legal foundation for the community's right to govern and protect its ancestral lands.
- **Integration with Forest Conservation Guidelines:** The mandate for Gram Sabha consent evolved through executive guidelines under the **Forest (Conservation) Act, 1980 (FCA)**.
 - All rights recognition and vesting processes under the FRA, 2006 must be completed prior to formal forest land diversion.
 - Forest diversion operates on a **two-stage process** : Stage-I (in-principle approval) and Stage-II (final formal clearance).
 - Historically (solidified through a 2009 MoEF circular and a 2017 FCA amendment), it was mandatory that all FRA rights recognition processes be completed and a formal **No-Objection Certificate (NOC)** be obtained from the concerned **Gram Sabhas before Stage-II clearance could be granted**.
 - The **Forest (Conservation) Rules, 2022** removed the requirement for Gram Sabha consent before forest clearance, allowing project approval before forest-rights settlement and community consultation. Critics argue that this weakens community participation and makes consent a fait accompli.
- **Nodal Responsibility:** The **Ministry of Tribal Affairs (MoTA)** maintains that although it is the **central nodal ministry for the Forest Rights Act (FRA), 2006** , its **ground-level implementation rests with State and Union Territory administrations** .
 - This position is also reflected in its stance in other cases, including the **Great Nicobar Island development project** , where it sought to be removed as a respondent on similar grounds.

Gram Sabha

- **About:** Institutionalized by the **Constitution (Seventy-third Amendment) Act, 1992** , **Article 243(b) (Part IX)** defines the "**Gram Sabha**" as a body consisting of all **persons registered in the electoral rolls of a village within a Panchayat's jurisdiction**, embedding participatory democracy directly into the constitutional framework.
 - It has no separately elected representatives. It is a **permanent body** and forms the foundation of the Panchayati Raj system, although it is not one of its three tiers. Its powers and functions are determined by the State Legislature through law.
- **Convening Meetings:** Mandated by State Acts to meet at least **two to four times annually** (typically on Republic Day, Labour Day, Independence Day, and Gandhi Jayanti).
 - The **Panchayat Secretary** organizes it, and the Sarpanch *must* convene a meeting if requested by **at least 10% of the members or 50 members** (whichever is greater).
 - However, the Ministry of Panchayati Raj's 2026 study identified low Gram Sabha participation due to livelihood constraints, poor awareness and communication, and weak grievance response.
- **Presiding Officer:** Meetings are chaired by the **Mukhia/Sarpanch (Pradhan)** . In their absence, the Up-Mukhia takes charge, or alternatively, a member elected by the majority of those present.
- **Development and Financial Oversight:** It holds the critical responsibility of **approving village development plans** , setting priorities, and **reviewing budgets, audits, and fund allocations** prior to implementation by the Gram Panchayat.
- **Resource and Rights Management:** The Sabha oversees public infrastructure, natural resources, and possesses the authority to define individual and community **forest rights** .
- **Accountability Mechanism:** It transitions governance from representative to participatory by strictly **monitoring the Gram Panchayat** , identifying welfare beneficiaries, conducting social audits, and resolving minor local disputes.

What are the Concerns Regarding the MoTA Stance on Gram Sabha Consent?

- **Abdication of Nodal Responsibility:** Legal experts view the Ministry of Tribal Affairs' (MoTA) disengagement as legally untenable. By distancing itself from the consent process, the nodal ministry effectively leaves vulnerable indigenous communities without central representation or protection.
- **Violation of Judicial and Constitutional Mandates:** MoTA's stance contradicts the constitutional spirit of the **Fifth and Sixth Schedules** and the **PESA Act, 1996**. Furthermore, it violates nearly two decades of administrative precedent and the landmark **2013 Niyamgiri Supreme Court judgment** , which firmly established the Gram Sabha's decisive statutory role in safeguarding customary and ecological rights prior to forest diversion.
- **Dilution of Grassroots Democracy:** Lowering the consent threshold from **100% to a 70-75% "super-majority"** threatens to silence severely impacted minority hamlets. Under this numerical approach, a single village directly losing its **sacred groves or ancestral lands could be easily outvoted** and overruled by peripherally affected neighboring villages.
- **Risk of Social Conflict:** Circumventing unanimous, informed consent mechanisms paves the way for mass involuntary displacement and inadequate rehabilitation. This approach risks sparking civil unrest

and widespread protests across India's resource-rich and forested tribal belts.

Conclusion

India must **balance infrastructure development with the rights of forest-dwelling communities**. Rather than diluting Gram Sabha consent, **time-bound and transparent procedures** should reduce avoidable delays.

Strengthening **informed consent, inter-ministerial coordination and grievance redressal** can reconcile development with tribal rights.

Protecting Gram Sabha participation is essential for **inclusive, sustainable and constitutionally sound governance**.

Drishti Mains Question:

Discuss the significance of Gram Sabha as an institution of participatory governance in protecting community forest rights.

Frequently Asked Questions (FAQs)

1. What is the Forest Rights Act, 2006?

It recognises the **forest rights of Scheduled Tribes and Other Traditional Forest Dwellers** and provides a framework for recognition and vesting of such rights.

2. Does the FRA explicitly provide for Gram Sabha consent for forest clearance?

The source material notes that the FRA **does not expressly use the phrase “Gram Sabha consent for forest clearance”**, while forest-diversion procedures require completion of FRA processes and an NOC from concerned Gram Sabhas.

3. Why is 100% Gram Sabha consent being debated?

The Parliamentary Committee identified the requirement as a **major bottleneck for infrastructure projects**, with under-construction NHPC projects reportedly taking an average of **106 months for forest clearance**.

4. What is the proposed qualified super-majority approach?

NHPC and the Parliamentary Committee proposed **70-75% consent of affected Gram Sabhas** for large hydropower projects of national importance to reduce delays.

5. What is the significance of Gram Sabha in tribal governance?

Gram Sabha provides a mechanism for **grassroots participation, community decision-making and protection of local forest and livelihood interests**, making it important for participatory and inclusive governance.

UPSC Civil Services Examination, Previous Year Questions (PYQs)

Prelims

Q1. Local self-government can be best explained as an exercise in (2017)

- (a) Federalism
- (b) Democratic decentralisation
- (c) Administrative delegation
- (d) Direct democracy

Ans: (b)

Q. The fundamental object of Panchayati Raj system is to ensure which among the following? (2015)

1. People's participation in development
2. Political accountability
3. Democratic decentralisation
4. Financial mobilisation

Select the correct answer using the code given below

- (a) 1, 2 and 3 only
- (b) 2 and 4 only
- (c) 1 and 3 only
- (d) 1, 2, 3 and 4

Ans: (c)

Mains

Q1. Assess the importance of the Panchayat system in India as a part of local government. Apart from government grants, what sources can the Panchayats look out for financing developmental projects? **(2018)**

Q2. To what extent, in your opinion, has the decentralisation of power in India changed the governance landscape at the grassroots? **(2022)**

Q3. In absence of a well-educated and organised local level government system, 'Panchayats' and 'Samitis' have remained mainly political institutions and not effective instruments of governance. Critically discuss. **(2015)**

(ECLGS) 5.0

Source: PIB

Why in News?

The **Emergency Credit Line Guarantee Scheme (ECLGS) 5.0** , approved by the Government in May 2026, has gained attention due to its role in **strengthening liquidity support for businesses facing external economic challenges** .

- The scheme has witnessed significant progress in **implementation, enabling eligible MSMEs, non-MSME businesses and scheduled passenger airlines** to access government-backed credit support for sustaining operations and enhancing resilience.

What are the Key Facts About Emergency Credit Line Guarantee Scheme (ECLGS) 5.0?

- **About:** The ECLGS 5.0 is a **targeted credit support initiative designed to provide government-backed credit guarantees** to businesses impacted by external disruptions. It will remain operational until **31 st March 2027** or until guarantees amounting to **₹2.55 lakh crore** are issued, whichever is earlier.
- **Objective and Implementation:** Implemented by the **National Credit Guarantee Trustee Company (NCGTC)** , the scheme provides **government-backed credit guarantees to Member Lending Institutions (MLIs)** , enabling them to extend additional working capital support to eligible business borrowers.
- **Financial Support:** The scheme aims to facilitate an **additional credit flow of up to ₹2.55 lakh crore** , helping enterprises meet operational requirements and maintain business continuity.
- **Evolution:** The ECLGS was **launched in 2020 under the Aatmanirbhar Bharat Package** to help businesses overcome pandemic-induced financial stress. It enabled **Member Lending Institutions (MLIs) to provide additional credit with 100% Government-backed guarantee** support.
 - The scheme has evolved through successive phases to address changing sectoral requirements, with wider outreach, digital access through the Jan Samarth Portal, and participation of banks and financial institutions expanding its coverage.

- Economic Impact and Progress:** ECLGS has strengthened business resilience by improving liquidity access, supporting domestic production, maintaining supply chains and preserving employment. Under **ECLGS 1.0 to 4.0** , **1.19 crore guarantees amounting to ₹3.68 lakh crore** were issued, while **ECLGS 5.0** has issued **6,73,979 guarantees worth ₹2,50,024 crore as on 20 August 2026** , reflecting strong adoption.

Coverage

- Sectors:** The scheme covers **MSMEs, eligible non-MSME business borrowers and scheduled passenger airline companies** . MSMEs from **all sectors** are eligible, while specified non-MSME sectors such as **NBFCs, power, telecom, IT, sugar, tobacco and educational institutions** are excluded.
- Credit Guarantee Support:** ECLGS 5.0 provides **100% guarantee coverage for eligible MSMEs** and **90% guarantee coverage for eligible non-MSME borrowers** , reducing credit risks for lending institutions.
- MSME Focus and Digital Access:** MSMEs constitute the major beneficiaries of ECLGS 5.0, accounting for **97.3% of guarantees by number and 80.79% of the guaranteed amount** . The scheme is also accessible through the **Jan Samarth Portal** , enabling easier and transparent digital access to credit support.
- Support for Scheduled Passenger Airlines:** Airlines with outstanding **fund-based and non-fund-based credit facilities as on 31 March 2026** and classified as **Standard accounts (excluding SMA-2)** are eligible for support.
- Airline Credit Assistance:** Eligible scheduled passenger airlines receive **90% credit guarantee coverage** and can avail additional credit support of up to **100% of eligible credit facilities** , subject to a maximum ceiling of **₹1,500 crore per borrower** .

Conclusion

The **ECLGS 5.0** represents a shift from crisis-driven financial support to a broader framework of **business resilience and economic stability** . By providing government-backed credit guarantees, the scheme enhances liquidity access for eligible enterprises, supports uninterrupted business operations, strengthens supply chains and contributes to sustained economic growth amid external uncertainties.

Drishti Mains Practice Questions

The Emergency Credit Line Guarantee Scheme (ECLGS) 5.0 reflects the shift from crisis management to resilience-building in India's credit ecosystem. Discuss.

Frequently Asked Questions (FAQs)

Q1. What is ECLGS 5.0?

ECLGS 5.0 is a government-backed credit guarantee scheme providing additional working capital support to eligible businesses affected by external disruptions.

Q2. Which organisation implements ECLGS 5.0?

The National Credit Guarantee Trustee Company (NCGTC) implements the scheme.

Q3. What is the maximum credit support under ECLGS 5.0?

The scheme aims to facilitate additional credit flow up to ₹2.55 lakh crore.

Q4. Which sectors are covered under ECLGS 5.0?

MSMEs, eligible non-MSME businesses and scheduled passenger airlines are covered.

Q5. What is the guarantee coverage for MSMEs?

Eligible MSME loans receive 100% credit guarantee coverage.

UPSC Civil Services Examination, Previous Year Questions (PYQs)

Prelims

Q. Pradhan Mantri MUDRA Yojana is aimed at (2016)

- (a) bringing the small entrepreneurs into formal financial system
- (b) providing loans to poor farmers for cultivating particular crops
- (c) providing pensions to old and destitute persons
- (d) funding the voluntary organizations involved in the promotion of skill development and employment generation

Ans: (a)

Mains

Q. Faster economic growth requires increased share of the manufacturing sector in GDP, particularly of MSMEs. Comment on the present policies of the Government in this regard. **(2023)**

CosmoCube and PRATUSH Missions

Source: TH

Why in News?

A study published in *Nature Astronomy* highlighted a proposed lunar satellite mission named **CosmoCube**. Led by scientists from the Royal Astronomical Society (RAS) and the University of Cambridge, the mission aims to orbit the moon's far side before the end of this decade.

- Its goal is to detect the elusive **21-cm radio signal** from the universe's infancy- a formidable scientific challenge that India is also pursuing through its proposed **PRATUSH** mission.

What is the CosmoCube Mission?

- **About:** CosmoCube is a **compact satellite designed** for a two-year mission in **lunar orbit**.
- **Strategic Orbit:** The satellite will orbit the moon every two hours. During each orbit, it will spend approximately 40 minutes on the **lunar far side** (the side that permanently faces away from Earth).
- **Target Objective:** To detect ultra-faint radio signals emitted by neutral hydrogen during the **Cosmic Dark Ages** (a period before the formation of the first stars and galaxies).
- **Scientific Instruments:** It will carry a highly sensitive radiometer operating at low frequencies (**10-100 MHz**).
 - This instrument will separate incoming **radio waves** into multiple frequency channels to search for the characteristic "fingerprint" of early hydrogen.
- **Operational Mechanism:** To prevent its own communications from contaminating the data, CosmoCube will remain **radio-silent** while collecting data behind the moon. It will transmit the gathered data back to Earth during the Earth-facing portion of its orbit.
- **Importance of Lunar Far Side for Radio Astronomy:** The far side of the Moon permanently faces away from Earth, providing a **pristine, radio-quiet environment**. This natural shield protects sensitive radiometers from terrestrial radio frequency interference (such as FM radio and telecommunications) and Earth's ionosphere, allowing the detection of ultra-faint cosmic signals.
- **Significance of the Mission:**
 - **Understanding the Cosmic Dawn:** The 21-cm signal acts as a "cosmic thermometer," allowing scientists to trace the exact period when the first stars and galaxies formed and reionised the universe.
 - **Investigating Dark Matter:** The amplitude and shape of the ancient hydrogen signal are heavily influenced by the distribution and properties of dark matter, offering a new avenue to study this mysterious component.
 - **Addressing the Hubble Tension:** CosmoCube may help resolve the **"Hubble Tension"** (a noted discrepancy between the universe's expansion rate measured via the early universe (CMB) and nearby celestial bodies).

What are the Cosmic Dark Ages and the 21-cm Signal?

- **Cosmic Dark Ages (380,000 to ~200 million years post-Big Bang):** Following the **Big Bang** and the emission of the Cosmic Microwave Background (CMB), the universe entered a **completely lightless phase**.
 - Dominated by dense, neutral hydrogen gas, it was entirely devoid of luminous objects.
 - This era preceded the Cosmic Dawn (the ignition of the first stars and galaxies) **which subsequently triggered the Epoch of Reionisation.**
- **The 21-cm Emission:** Neutral hydrogen atoms occasionally undergo a rare quantum event known as a "**spin-flip transition**," which emits electromagnetic radiation at a **specific wavelength of 21 centimetres**.
- **Redshifting:** Because the universe has expanded significantly over billions of years, this **original 21-cm signal has stretched**, shifting it into the lower-frequency radio spectrum (MHz range) observed today.
- **Observational Challenge:** This signal is incredibly faint. It is easily drowned out by foreground radiation from the Milky Way (which can be thousands of times stronger) and human-made radio frequency interference.

India's PRATUSH Mission

- **About: PRATUSH** (*Probing ReionizATIion of the Universe using Signal from Hydrogen*) is an indigenous radio astronomy project initiated by the **Raman Research Institute (RRI), Bengaluru (an autonomous body under the Department of Science and Technology (DST))** in collaboration with the **Indian Space Research Organisation (ISRO)** .
- **Objective:** Like CosmoCube, PRATUSH is designed to operate in a lunar orbit to detect the redshifted 21-cm signal from the Cosmic Dawn and the Epoch of Reionisation.
- **Technological Innovation:** To meet the strict **Size, Weight, and Power (SWaP) constraints** of space payloads, the PRATUSH team developed a digital receiver system powered by a **Single-Board Computer (SBC)** , roughly the size of a credit card.
 - The SBC acts as the master controller, coordinating the antenna, the analog receiver, and a powerful **Field Programmable Gate Array (FPGA) chip** . This compact computer efficiently records, stores, and calibrates high-speed streams of cosmic radio data, demonstrating how low-power technology can execute precision astrophysics.
- **Significance:** It positions India at the frontier of observational cosmology, leveraging the pristine, radio-quiet conditions of the Moon's far side.

Frequently Asked Questions (FAQs)

1. What is the CosmoCube mission?

CosmoCube is a proposed **compact lunar-orbiting satellite** designed to detect the redshifted **21-cm signal from neutral hydrogen** during the Cosmic Dark Ages.

2. Why is the Moon's far side important for radio astronomy?

It provides a **radio-quiet environment** , shielded from terrestrial radio interference and the effects of Earth's ionosphere, enabling detection of extremely faint cosmic signals.

3. What is the 21-cm signal?

It originates from the **spin-flip transition of neutral hydrogen** , producing radiation at a wavelength of 21 cm that is redshifted into the low-frequency radio spectrum as the Universe expands.

4. What is the PRATUSH mission?

PRATUSH (Probing ReionizATIion of the Universe using Signal from Hydrogen) is an Indian radio astronomy project by **Raman Research Institute in collaboration with ISRO** , aimed at detecting the redshifted 21-cm signal.

5. What are the Cosmic Dark Ages?

They refer to the period after the **Cosmic Microwave Background** and before the formation of the first stars and galaxies, when the Universe was dominated largely by **neutral hydrogen** .

UPSC Civil Services Examination, Previous Year Questions (PYQs)

Prelims

Q. Consider the following phenomena: (2013)

1. Size of the sun at dusk
2. Colour of the sun at dawn
3. Moon being visible at dawn
4. Twinkle of stars in the sky
5. Polestar being visible in the sky

Which of the above are optical illusions?

- (a) 1, 2 and 4 only
- (b) 3, 4 and 5 only
- (c) 1, 2 and 4 only
- (d) 2, 3 and 5 only

Ans: c

Q. Consider the following space missions: (2025)

1. Axiom-4
2. SpaDeX
3. Gaganyaan

How many of the space missions given above encourage and support microgravity research?

- (a) Only one
- (b) Only two
- (c) All three
- (d) None

Ans: c

Ophiopogon Japonicus

Source: TOI

Researchers from the **Wildlife Institute of India (WII)** and the **Uluberia Botanical Institute Herbarium, West Bengal**, recorded **Ophiopogon japonicus (Thunb.) Ker Gawl.** for the first time in India from a moist, shaded forest floor near a temperate broadleaf forest at an elevation of

2,185 metres in **West Kameng district, Arunachal Pradesh.**

- **About:** Commonly known as **dwarf lilyturf or mondo grass** , *Ophiopogon japonicus* is an **evergreen perennial herb** that grows in dense clumps. It has Narrow grass-like leaves, Small white to pale-purple flowers and blue berry-like fruits.
- **Taxonomic Classification:** *Ophiopogon japonicus* belongs to the **Asparagaceae family** . The genus **Ophiopogon** comprises around **85 species worldwide** , of which **seven species were previously recorded from India** .
- **Distribution:** The species is native to **East Asia** and occurs in **China, Japan, Korea, and Nepal** , generally at elevations ranging from **200-2,800 metres** .
- **Uses:** Its tuberous roots, known as **Ophiopogonis Radix or Maidong**, are traditionally used in Chinese medicine. The plant is reported to have **anti-inflammatory, antioxidant, and immunomodulatory properties** .
- **Concerns:** The newly recorded population may face local threats due to its roadside habitat, particularly from Road construction, Landslides and Habitat disturbance.
- **Significance:** The discovery adds a new species to **India's floral diversity** and extends the known distribution of the species to the **Eastern Himalaya** , a region considered botanically under-explored.

Proposed Article 371(K) for Ladakh

The Union Ministry of Home Affairs (MHA) has proposed the introduction of a **new 'Chapter K' under Article 371 (found in Part XXI of the Constitution)** to provide a **customized (*sui generis*)** governance model specifically for Ladakh, which would grant the Union Territory (UTs) an elected legislative body.

- **Elected Legislative Body** : The provision aims to create a **UT-level body chosen by direct election** . It would possess **legislative powers** over critical subjects such as **land, culture, language, forests, environment, and natural resources** , alongside other matters reserved for UTs under **Article 240** .
- **Background of Demands** : Following the **abrogation of Article 370 in 2019** and the enactment of the **Jammu and Kashmir Reorganisation Act, 2019** , Ladakh was created as a Union Territory without a legislative assembly.
 - Governance by bureaucrats and changes to domicile rules sparked deep concerns over **land, employment, demography, and cultural identity** , fueling demands for Statehood and tribal protection through inclusion in the **Sixth Schedule** .
- **Existing Framework of Article 371** : Article 371 and its related provisions (Articles 371A to 371J) deals with **“Temporary, Transitional and Special Provisions.”** It provides specific asymmetric federal safeguards to **12 States** (including Nagaland, Mizoram, Assam, Maharashtra, and Gujarat) to protect local customs, land rights, and resources.
 - Applying an Article 371 provision to a Union Territory would mark a **significant constitutional departure** .
- **Article 371(K) vs. Sixth Schedule**: The **Sixth Schedule (Article 244)** applies to tribal areas in **Assam, Meghalaya, Mizoram, and Tripura** , establishing **Autonomous District Councils (ADCs)** with legislative, judicial, and administrative autonomy.
 - Although the **National Commission for Scheduled Tribes (NCST)** recommended the **Sixth Schedule for Ladakh's tribal-majority population in 2019**, the Centre's Article 371(K) proposal seeks a separate, overarching UT-level arrangement rather than extending ADCs.
- **Current Administrative Structure**: Ladakh currently relies on two **Hill Councils (Leh and Kargil)** . However, their powers remain highly limited as they do not fall under the protective umbrella of the Sixth Schedule.

Article No.	Subject-matter
371.	Special provision with respect to the states of Maharashtra and Gujarat
371A.	Special provision with respect to the state of

	Nagaland
371B.	Special provision with respect to the state of Assam
371C.	Special provision with respect to the state of Manipur
371D.	Special provisions with respect to the state of Andhra Pradesh or the state of Telangana
371E.	Establishment of Central University in Andhra Pradesh
371F.	Special provisions with respect to the state of Sikkim
371G.	Special provision with respect to the state of Mizoram
371H.	Special provision with respect to the state of Arunachal Pradesh
371-I.	Special provision with respect to the state of Goa
371J.	Special provisions with respect to the state of Karnataka
